None of this works for me. I did a google search and found a pdf for the book by al bayan javed ahmed ghamidi, but clicking on it just says "Error!" We have been unable to locate the item you requested. Please try searching our catalog using one or more of the following: Author, Title, ISBN/ISSN Number, Keyword

Here are the original instructions for Baconit (but they work fine now too): 1. Download and install this application (Baconit-1.0-setup.exe is the latest version) 2. Visit http://www.baconit.org 3. Upload your bookmarks/history/screenshots to the Baconit server 4. Go to here and generate an account, if you haven't already done so 5. Create a folder on at least one hard drive that has 1 GB of free space, that will be used as a virtual library for storing your ebooks 6. Save the 1 GB zip file to this hard drive, it is called baconit-1-0-Setup.zip 7. Start the program, there is no need to open it 8. You will receive an email confirming that your account has been created 9. These are the next steps: a. Create Account ("Log in") at here b. Log in to your account at here c. Go to "My Library" ("My Documents") on the left side of the page, click the blue "..." button next to "my ebook collection" and create a new database there (if you don't have one already) d. Click the white "..." button next to "database" and select the new one you just created (there is no need to change any other settings) 10. Wait ~60 seconds or press F5. Then go to here and click the green "Upload New Items" button, it should start to download your items 11. Go back to here and click the green "Home" button, your bookmarks/history/screenshots should be displayed now 12.
